Detailed Analysis by Content
Patient Group: Male
Patient Group: Female
Patient Group: Older Adult (66 and older)
Physician Task: Applying Foundational Science Concepts
Physician Task: Diagnosis
Physician Task: Health Maintenance, Pharmacotherapy, Intervention & Management
Physician Task: Legal/Ethical, Biostatistics and Epidemiology
System: Blood & Lymphoreticular and Immune
System: Nervous Systems and Special Senses
System: Musculoskeletal, Skin, & Subcutaneous Tissue
System: Cardiovascular
System: Respiratory
System: Gastrointestinal

<u>System: Renal/Urinary and Male and Female Reproductive</u>
<u>System: Endocrine</u>
<u>System: Multisystem Processes/Disorders, Legal/Ethical, Biostats/Epidemiology</u>
<u>Site of Care: Ambulatory</u>
<u>Site of Care: Emergency Department</u>
<u>Site of Care: In-Patient</u>

*Because this assessment is designed to be integrative, many items contribute to more than one score category.

The table below provides a history of your performance on the last six assessments you have completed, since July 18, 2019, along with test date and timing information. The test date corresponds to the date you completed each assessment. A score interpretation guide has been included at the end of this report to help you interpret your Assessment Scores.

Total test scaled scores from CMS forms started on or after October 29, 2015 cannot be directly compared to scaled scores reported prior to October 29, 2015.

Take	Test Date	Timing	Assessment Score
1	11/25/2019	Standard	20

Score Interpretation Guide

This guide will help you interpret the Assessment Score you received on this self-assessment.

The scores on this self-assessment are scaled to have a mean of 20 and a standard deviation of 3 based on a recent group of examinees who took the Medicine Subject Examination for the first time as a final clerkship examination. The following information is provided in response to user requests to “translate” this self-assessment score to the clinical science subject examination equated percent correct scale. The NBME does not warrant that any individual performance on the self-assessment will predict performance on the clinical science subject examination and cautions users of this self-assessment against making any predictive inferences.

In the following table, locate your self-assessment score and find the approximate corresponding subject examination score in the adjacent column. For example, if your self-assessment score is 20, it approximates a Medicine Subject Examination score of 73.

Total test scaled scores from CMS forms started on or after October 29, 2015 cannot be directly compared to scaled scores reported prior to October 29, 2015.
