

## New Score Reports for Comprehensive Subject Examinations Begin on August 1, 2019

Faculty will see redesigned score reports for the Comprehensive Basic Science and Comprehensive Clinical Science Subject Examinations beginning with administrations on August 1, 2019. The updated score reports will have a modern look and feel and reflect both advances in the underlying science of assessment and improvements in [performance feedback](#).

Here are some benefits of the new format:

- Assessing your students' progress will be easier because scores will be directly comparable on the Comprehensive Subject Exam and corresponding United States Medical Licensing Examination® (USMLE®) Step.
- Examinee performance explanations and illustrations align with the USMLE performance report.
- You will no longer need to look up the approximate USMLE score table; the Comprehensive Subject Exam score will now be on the same scale.

**Note:** Score feedback for the remainder of the NBME Subject Exams will undergo only minor formatting changes with no content changes at this time.

### Important Dates:

- To allow sufficient time for quality assurance, score reporting will be temporarily suspended for **ALL** subject examinations starting with those administered on **August 1st through August 4th**.
- All scores will appear in the NBME Services Portal (NSP) no later than **Monday, August 5th**.

If you have any questions about these updates, please contact the Subject Examination team at [subjectexams@nbme.org](mailto:subjectexams@nbme.org).
